-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## DETAILED ACTION

### *Response to Amendment*

1. This is in response to the Amendments received on May 24, 2004.
2. Claims 1-24 are currently pending in this application. Claim 18 has been amended.

### *Election/Restrictions*

3. Applicant's election of Group I, claims 1-4 and 14-16, in the reply filed on May 24, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
4. Since claim 18 has been amended to depend on claim 17, claim 18 is now included in Group II, and not Group I.

### *Double Patenting*

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1711

6. Claims 1-4, 14-16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3-12 of U.S. Patent No. 6,720,375. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the patent contain the subject matter that is narrower in scope than that of the instant claims, rendering them obvious over each other.

Claims 11-12 of the patent, each discloses all of the limitations recited in the instant claims 1-3. However, claims 11-12 of the patent disclose an additional limitation on the radical scavenger. Hence, the scope of the claims of the patent encompasses that of the instant claims, rendering them obvious over each other.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-4 and 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakurai JP 09137143).

Sakurai teaches an optic comprising a polarizing plate pasted to a protective layer by an adhesive layer; wherein the adhesive composition comprises an acrylic resin and a crosslinking agent (see paragraphs 0001, 0005). The acrylic resin comprises a copolymer of acrylic-acid alkyl ester having a weight average molecular weight of 500,000-900,000; and the crosslinking agent comprising tolylene diisocyanate and tolylene diisocyanate addition (adduct) product of a

trimethylolpropane in a ratio of 3:1, wherein the crosslinking agent is of 0.01-5 weight percent per 100 weight percent of the acrylic resin (see paragraphs 0006, 0024); which read on the instantly claimed ranges.
